CloudFormation > Stacks > Create stack

Step 1

Create stack

Step 2

Specify stack details

Step 3

Configure stack options

Step 4

Review and create

Specify stack details

Provide a stack name

Stack name

s3EC2setUp

Stack name must contain only letters (a-z, A-Z), numbers (0-9), and hyphens (-) and start with a letter. Max 128 characters. Character count: 10/128.

Parameters

Parameters are defined in your template and allow you to input custom values when you create or update a stack.

No parameters

There are no parameters defined in your template

Cancel

Previous

Next

Specify whether resources that were created during a failed operation should be deleted regardless of their deletion policy. [Learn more](#) 📄

- ☒ **Use deletion policy**
Retains or deletes created resources according to their attached deletion policy.
- ☐ **Delete all newly created resources**
Deletes created resources during a rollback regardless of their attached deletion policy.

Additional settings

You can set additional options for your stack, like notification options and a stack policy. [Learn more](#) 📄

- ▶ **Stack policy - optional**
Defines the resources that you want to protect from unintentional updates during a stack update.

- ▶ **Rollback configuration - optional**
Specify alarms for CloudFormation to monitor when creating and updating the stack. If the operation breaches an alarm threshold, CloudFormation rolls it back.

- ▶ **Notification options - optional**
Specify a new or existing Amazon Simple Notification Service topic where notifications about stack events are sent.

- ▶ **Stack creation options - optional**
Specify the timeout and termination protection options for stack creation.
